MB Docket No. 04-160

Ms. Marlene H. Dortch  
Secretary  
Federal Communications Commission  
445 Twelfth Street, S.W.  
Washington, DC 20445

Dear Ms. Dortch:

**WBEB FM 101 PHILADELPHIA SUPPORTS THE NAB PETITION**

XM and Sirius have clearly broken their commitment to the FCC to provide a national service only. This breach will cause severe economic harm to local radio stations.

Satellite radio by its very nature has no local roots, no community involvement.

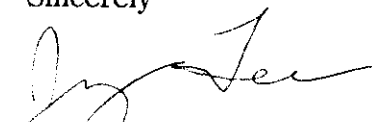

We, and most other local broadcasters, have a significant investment in staff – over a dozen people including on air personalities and promotional crews that head up our year-round community involvement programs. In addition, we have a fleet of vehicles and event staging equipment for our calendar of local appearances.

We create and sponsor several major annual events with local charities such as The Salvation Army and Race For The Cure.

These activities are above and beyond our community obligations and will be threatened by the incursion of local satellite broadcasting.

We urge the FCC to hold satellite broadcasters to their promise and continue safeguarding the valuable work performed in every community by its local broadcasters.

Sincerely

Jerry Lee
